- E. SESSION SUMMARY:

The target is a round, circular, disc shaped object, which is light and energy. Some metal can be found in association with this object. The target itself is associated with water. The target evokes feeling and emotion. It is related to a structure which is symbolically representative of authority, power, and justice, or at one time rulership of a people.

1. All five sources agree on the presence of an evident land and water interface that is associated with the target. Indeed the emphasis was placed on the concept of "water" There were two principal concepts associated with the target. The first appeared to deal with a structure whose shape appeared to be cylindrical or oval. There appeared to be a historical and a religious significance attached to the target structure. In a second instance, the target was described as a airport. And one viewer described the structure as a dam.
